Algorithm of the Future

Algorithm for Acquiring Properties of Matter and Life Processes

by Pawel Kozycz · Solson Publications · 2026

The Core Equation

EvmDNA < Eskm1DAA

Evolution acting on matter through the passive code of DNA (EvmDNA) is mathematically, philosophically, and existentially inferior to Economic investment (Esk) creating newly purposed matter (m1) through Dynamic Active Administration (DAA). This is not a rejection of nature or evolution — it is their ultimate completion.

Synopsis

For the entirety of human history, we have labored under the illusion that the universe is a static, rigid background over which we have little fundamental control. Algorithm of the Future shatters that illusion. It proposes that humanity can consciously redesign the cosmos — from smartphone-controlled moonbots on the lunar surface to the total administration of life and matter. The journey begins on the Moon and builds toward a unified theory of humanity not as passive observers, but as active co-creators of the cosmos.

Key Concepts

Moonbots

Smartphone-controlled mini-robots on the lunar surface — the democratization of space as both engineering proposal and philosophical statement about human agency.

Selective Economy

The deliberate redirection of economic flows toward the infrastructure of the administered future — the antithesis of the Vanity Economy.

DAA Seed

The first self-replicating unit of Dynamic Active Administration. Once it germinates, the rate of progress itself begins to compound — Hyper-Evolution has begun.

The Master Algorithm

The unified field theory of administration. Bird Vision and the end of entropy — reframing entropy not as a physical law, but as an administrative failure.

Five Parts · Twenty-Two Chapters

Part I — The Matrice Foundations

- The Neo-Cycling Of Matter And Life
- Absolute Parameters And The Hacking Of Reality
- The Selective Economy And The Lunar Totus Tuus
- The Process Superstructure And The De-Mattering Of The World
- The Smartphone On The Moon
- Lunar Totus Tuus: Building The Neo-Infrastructure
- De-Mattering The Monopoly: The Fall Of The Vanity State

Part II — Escape From The Rigid Model

- The Rigid Model Of Nature And The Escape From The Jungle
- Moon Neo-Evolution — The New Paradigm
- The Daa Seed And The Germination Of The Future
- Beyond Evolution And Creation — The Administrative Synthesis
- Through Lunar Gadgets To The Megaproject — The Stealth Revolution

Part III — The Calculus Of Survival

- The Inversion Model — The Calculus Of Survival
- Taming Evolution — Harnessing The Blind Giant
- Resurrection Of The Material Model — Matter As Information

Part IV — The Internal Hack

- De Re Neo Generation — The Internal Hack
- The Gospel Of Hyper-Evolution — The Announcement Of Capacity
- The Costlessness Of Civilizational Leaps — Economic Zero Gravity

Part V — The Administered Future

- Artificial God — Artificial Nature: The Total Management
- The Birth Of God Within Us — The Cosmic Sherlock Holmes
- The Master Algorithm — Bird Vision And The End Of Entropy
- The Administered Future — A Letter To The First Generation
